OIL LOSS LOG

Property Name _____ Elevator # _____

For systems where the part of cylinder and/or piping is not exposed for visible inspection, a written record shall be kept of the quantity of hydraulic fluid added to the system and emptied from leakage collection containers and pans. The written record shall be kept in the machine room. When the quantity of hydraulic fluid loss cannot be accounted for, the test specified in 8.11.3.2.1 and 8.11.3.2.2 shall be madeper ASME A17.1.

Note: A total capacity of 5 gallons of oil collection is permitted in the pit area.

Date	Amount of Oil Added	Oil Level In Tank	Oil Loss Visual Leakage (Y/N)	Initials
